Data layers from LPJ-EOSIM L2 Global Simulated Daily Wetland Methane Flux V001 and the Low Latency equivalent are combined into a single collection for the GHG Center: lpjeosim-wetlandch4-daygrid-v2

Data layers from LPJ-EOSIM L2 Global Simulated Monthly Wetland Methane Flux V001 and the Low Latency equivalent are combined into a single collection for the GHG Center: lpjeosim-wetlandch4-monthgrid-v2

## Confirmation of Successful Data Transfer

Data is obtained directly from an S3 bucket owned by the NASA LP DAAC, so no data transfer is occurring. Since the data is being maintained external to the GHG Center, it is the responsibility of the data provider to ensure the integrity of the data.

## Summary

- We are confident that the display of data in the GHG Center is correct

- There were no problems identified in the data
