## Data Intake Processing and Verification Report

# [Draft - In Progress]

## **Background Information**

 Original Dataset Name: GEOS-Carb CASA-GFED Monthly Fire Fuel NPP Rh NEE Fluxes 0.5 degree x 0.5 degree V3 (GEOS\_CASAGFED\_M\_FLUX) at GES DISC

GHG Center Dataset Title: CASA-GFED3 Land Carbon Flux

Dataset Provider: NASADate Obtained: June 2023

Location Obtained From: <a href="https://doi.org/10.5067/03147VMJE8J9">https://doi.org/10.5067/03147VMJE8J9</a>
Data Location in GHG Center: casagfed-carbonflux-monthgrid-v3

Data POC(s): Dr. Lesley OttDataset File Type(s): NetCDF

• Projection (if different from WGS84): NA

#### **Data Transfer Confirmation**

An SHA-256 checksum is used to detect high-level errors within data transmissions.

- · Results from individual checksum file comparisons of pre-transfer and post-transfer
  - o All files were transferred successfully

Filename	SHA 256 Original file	

Report any individual file issues: NA

#### **Data Intake Process**

Link the document with all steps identified

#### **Overall Dataset Statistics**

- Data file reads confirmed:
- Mean, min, max across all files:
  - Original dataset:
  - COG transformed dataset:
- Distribution of values across all data (by variable)
  - Original dataset:
  - COG transformed dataset:

- File range (most cases will be all files)
- Bounding Box of all data
- Link to transformation record in Jupyter Notebook <>
- All values are in expected range (catches out of range values)

### Specific, Random Checks/Visual Confirmation

- Visual example and side by side comparison
- More detailed statistics for specific files (randomly chosen)
  - Statistics was performed for the following files:
    - TBD
- Data comparison at a few specific locations

### Summary

- We are confident that the transformation and display of data in the GHG Center is correct
- There were no problems identified in the data
- Link to user notebook <>
- Link to GHG Center data catalog overview page <>
